Solutions for Error Code 30034-4

Office programs will not open at all and give you an error code 1058-4. Even you get a different [error code 30034-4](#) when you try to repair or uninstall.

This is found on Windows 8.1 to 10 machines recently.

First, do a disc clean up so that we can remove old-Microsoft office installation traces from your computer.

How to do disc-cleanup:-

Method-1 Creating shortcut

1. Right click on your computer home screen, Go to “new” in the list and select “Shortcut”.
2. After clicking on a shortcut, a command prompt window will open and type the command “cleanmgr.exe” in it and name as you like to remember it as a disc clean up shortcut button.
3. Then an icon will appear on your home screen, click on it and select a required disc to clean up. (Normally Software’s gets installed on DRIVE:C which is default here).
