Windows Update Error 0x80070bc9

Error Code 0x80070bc9 error code is common for all the Windows Operating systems when you try to install the updates. It usually appears when Windows 10 or Windows 7 update system is broken or there is network related glitches.

Usual causes for this Error Code 0x80070bc9 are communication failure over the internet with Microsoft update servers.

Firstly, I will suggest you to do Windows Troubleshoot for Error Code 0x80070bc9.

Following these steps carefully will not make any changes to your personal data or programs. It will only reset the Windows update services.

1. Firstly, open Command Prompt as Administrator by right clicking on it.
2. Secondly, go to c:\windows\
3. After this, rename software distribution folder to old
4. Some cases it may not happen until you stop the windows update services
5. To stop that, you can run a command line "Net stop wuauserv" and hit Enter
